KOREAN TELEGRAPHIC CODE BOOK

KOREAN NAME BOOK

INDEX GUIDE

WITH CHARACTERS ARRANGED BY SOUNDS IN ENGLISH ALPHABETIC ORDER ACCORDING TO THE McCUNE-REISCHAUER SYSTEM OF TRANSLITERATION

E W JENSEN

FOR PACIFIC ISL. SEC.

GUIDE TO THE USE OF THE KOREAN TELEGRAPHIC CODE BOOK

On the page immediately following the FOREWORD is found a table of Korean sounds, listing the Korean alphabet renderings (HAN'GUL), the McCune-Reischauer spellings, and the pronunciations in familiar English words. Thorough familiarization with this section will assist in the use of the book, especially for field agency personnel involved in original transliteration.

On the reverse of the mentioned page are listed some common Korean family names. This section will be of major aid in converting to McCune-Reischauer spellings from other transliteration systems. Pages (I) through (IX) list the most common Korean family and given names, rendered in the McCune-Reischauer spellings, followed by the characters. (The letter-group following the number code is an outmoded alternative telegraphic listing; the letter-groups will be ignored in current usage.) This section may be used as a rapid reference in a majority of instances. However, when the particular character in question does not correspond to the character indicated within those pages, reference must be made to the body of the book to determine the correct code number for the character under study.

In the body of the book (pp 1-157), all the characters used in the commercial code system are arranged in alphabetic order, with characters under each alphabetic heading arranged in numerical order. Pages 158 and 159 are Korean national characters; these characters are most often used in names of the merchant and lower farmer class -- several of them will occur with considerable frequency. Character comparison will be facilitated by first locating the corresponding radicial (in a manner similar to initial location in the use of English dictionaries) and then making detail comparison of the remainder of the characters.

Appendix I contains the complete numerical listing of the commercial code, the McCune-Reischauer and Korean HAN'GUL alphabet spellings being substituted for the Chinese characters. This appendix will be valuable in the rapid verification of reported characters against previously accepted code numbers.

Appendix II lists all the Japanese and Korean national characters (numbering 254), and shows how the code numbers were derived for the characters on pages 158 and 159. This section will be of interest to only the language scholar and can be disregarded in normal usage of the book.

Code numbers are written in the same order as the characters they represent. They are separated by a virgule, with the entire group surrounded by parentheses. Interrogation points are used to signify unknown characters or characters not accepted as valid. The complete name (in McCune-Reischauer transliteration) and code group will be included the first time an individual is mentioned in a report or paper; thus, PAEK Pyong-sik (4101/3521/ ?). (Note: The interrogation point in this case indicates that, although the name is known to be "sik", it is either not known or not accepted which one of the 18 possible characters for "sik" is correct for the individual in question.) When the name has two characters (note SONU and TOKKO on page II, Common Family Names), the two code numbers will be separated by a comma. The family name (written first) is always written entirely in capitals; the given names start with a single capital and are separated by a hyphen. After the first mention, and identification, it is necessary to mention only so much of the name as will properly and correctly identify the individual.

Certain Korean names have, through common usage, become so accepted by English-speaking persons as to preclude changes in transliteration at this time. Therefore, the following names will continue to be referred to as indicated in the left-hand column; the right-hand column is the correct McCune-Reischauer transliteration and telegraphic code numbers:

李承晩	Syngman Rhee	YI Sung-man (2621/2110/2519)
金日成	KIM Il Sung	KIM Il-song (6855/2480/2052)
李範奭	LEE Bum Suk	YI Pom-sok (2621/4636/1163)

FOREWORD

This book was compiled to assist those who do not read Chinese characters in finding correct telecode numbers by the sound of the character in Korean. To use this telecode book one must be able only to compare the character on a document with the same character in the book, which will be found listed under its correct romanization according to the McCune-Reischauer system of transliteration. It is recognized that other transliteration systems are used, which may make it difficult to locate the proper sound. For example, the family name 白 is transliterated in the following manners: BAIK, BAEK, BACK, PACK, PAIK, PAEK. This character will be found only under the last spelling, PAEK. The greatest obstacle one must overcome is the idiosyncrasies of non-standardized transliteration systems. As an aid to the user of this book there is a list of common family names at the end of the FOREWORD spelled according to the M.-R. system, and other, non-standardized, renderings of the same name. This section is followed by nine pages of common family and given names, together with their correct romanizations and telecode numbers. Also, for easy reference, a table of Korean sounds, along with the Korean HAN'GUL alphabet and M.-R. renderings, has been included.

In the main section of the book each sound is listed in M.-R. and HAN'GUL on the outside edge of the page on which that sound occurs. At the end of each group of characters identified by the same sound there are several blank spaces left in which may be added new characters which might in the future be assigned telecode numbers. Spaces marked off by slanted lines indicate the beginning of a new sound.

The normal order of character listings is by radical and stroke count; however, to keep the numerical listing in proper sequence, the supplemental characters (as found in the supplement section of the standard telecode books) are divided from the others by a double line. A supplement is added at the end of the main body of the book which lists a group of characters not normally used in

the Korean language. They are included because there have been telecode numbers assigned to them in the Chinese telecode system, and, whereas their use in Korean text will be extremely limited, their numbers will be available for use when needed. At the end of this section there are two pages of Korean national characters, i.e., characters which were created by the Koreans with Chinese character radicals to express ideas for which there are no Chinese characters extant. A fuller explanation of these characters is given at the beginning of APPENDIX II.

APPENDIX I is a duplication of the normal telecode book, but with pronunciations substituted for characters. APPENDIX II lists the 254 national characters used in Japanese and Korean, with a new telecode system as explained at the head of the appendix.

KOREAN ALPHABET

CORRECT PRONUNCIATION AND MCCUNE-REISCHAUER TRANSLITERATION

VOWELS

Korean	M-R*	Sound	Korean	M-R*	Sound	Korean	M-R*	Sound
아	A	father	애	AE	hat	와	WA	water
오	O	home	야	YA	yacht	왜	WAE	wax
우	U	food	여	YŎ	clarion	워	WŎ	won
이	I	feet	요	YO	yoke	웨	WE	went
에	E	set	유	YU	use	위	WI	we
어	Ŏ	hut	얘	YAE	yam	외	OE	schön (German)
으	Ŭ	foreign	예	YE	yes	의	ŬI	build

CONSONANTS

Korean	M-R*	Sound	Korean	M-R*	Sound	Korean	M-R*	Sound
Initial			Initial			Final		
ㄱ	K	game	ㅊ	CH'	cheap	ㄱ	K	flak
ㅋ	K'	came	ㄹ	L,N,R	(used only as medial initial)	ㅅ	T	hut
ㄷ	T	done				ㅂ	P	pop
ㅌ	T'	ton	ㅁ	M	man	ㄹ	L	sell
ㅂ	P	ban	ㄴ	N	nun	ㅁ	M	sum
ㅍ	P'	pan	ㅅ	S	seek	ㄴ	N	kin
ㅈ	CH	Jeep	ㅎ	H	home	ㅇ	NG	ring

* Abbreviation for McCune-Reischauer transliteration.

NOTE: In combining consonant sounds with a vowel, the circle is replaced by the initial consonant (TAE=대), and the final consonant is placed directly under the other parts (ŬP=읍).

The apostrophe after a consonant denotes that the consonant sound should receive heavy aspiration. The lack of the apostrophe does not change the sound but only its aspirant value; viz., whereas a transliterated K, T, P, and CH, to the untrained ear, sound like G, D, B, and J, in reality they are spoken the same way as K', T', P', and CH', only with an almost indetectable explosive quality. The sounds G, D, B, and J, on the other hand, do exist in Korean, and are indicated in the Korean alphabet by ㄲ, ㄸ, ㅃ, and ㅉ respectively, although transliterated KK, TT, PP, and TCH, in respect to their Korean renderings. These sounds are rare, however, and are very seldom encountered in pronouncing Chinese characters, but are mainly used in native Korean words and in transliterating foreign words.

USUAL MISSPELLINGS OF COMMON KOREAN FAMILY NAMES

Chinese Char.	M-R Spellings	Misspellings
安	An	Ahn, Arn
蔡	Ch'ae	Chae, Chai
張	Chang	Chahng, Jang
趙,曹	Cho	Choh, Jho, Jo, Joe, Joh
崔	Ch'oe	Chey, Choe, Choi, Cheigh
鄭,丁	Chŏng	Jong, Jung, Joing
韓	Han	Hahn, Harn
異	I	Ee, Yi
任	Im	Yim
姜,康	Kang	Gang, Kahng
金	Kim	Gim, Kimm
羅	Na	Nah, Ra, Rah, Rha
浪	Nang	Lang, Rang

Chinese Char.	M-R Spellings	Misspellings
盧,魯	No	Noh, Raw, Ro, Roe, Roh, Rho, Rowe
嚴	Ŏm	Erm, Urm
白	Paek	Baek, Baik, Back, Pack, Paik
朴	Pak	Bak, Bark, Back, Pack, Park
徐	Sŏ	Serh, Shur, Soh, Sur
禹	U	Wu, Woo, Uh
梁	Yang	Ryang, Yahng, Young
李	Yi	I(*), Li, Lee, Rhee, Ri, Ree, Lhee, Lyi, Lhyi
林	Yim	Im(*), Lim, Limb, Rim
柳,劉,俞	Yu	Lyu, Lyoo, Rew, Ryu, Ryoo, Yoo, You, Yuh

(*) I, and IM are correct according to the McCune-Reischauer system, but the conventional spellings YI and YIM are preferred to I and IM.

APPENDIX II

There are 254 national characters in Japanese and Korean which heretofore have not been included in a telegraphic code system. A special system for these characters has been devised which is herein used for the first time. The telecode numbers are assigned in three-digit groups with the prefix "J" or "K" depending upon which language uses the character. In several instances the character is used both in Japanese and Korean, in which case it is listed with both prefixes. The Korean National Characters are listed in alphabetical order at the end of the alphabetical listings of Chinese Characters in the main section of the book.
